INDEX TO VOLUME XXV.

A.

Academy of Sciences, Paris, Prizes, 433.
Proceedings of, 304.
Acad. Nat. Sci. California, Proceedings, 152.
Philadelphia, Proceedings, 304.
Journal of, 304.
Acid, carbonic, in mineral waters, *Storer*, 41.
gallic, derivatives of, 101.
nitric, action on metallic chlorids, 371.
tartaric, combinations with saccharine matters, 101.
African geographical discoveries, 306.
Agassiz, Contributions to the Natural History of the U. States, noticed and reviewed, 126, 202, 321.
on the Embryology of the Turtle, 342.
Agriculture of Rome, 302.
Alexander, J. H., chemical examination of brown sugar, 393.
American Association, time of next meeting, 303.
Amylene in anesthesia, 95.
Analysis, mode of minute weighing, *Mc Muyer*, 30.
use of alumina for plant, *Rochleder*, 100.
Analytical chemistry: action of nitric acid on metallic chlorids, *Wurtz*, 371.
Andes, ascent of Chimborazo in, 141.
Anesthesia by amylene, 95.
by projection, 95.
Aquarium, history of, 97.
Arctic ocean, explorations, 84, 384.
pole, passage to, *I. I. Hayes*, 384.
Arru Islands, once part of Australia, 280.
Arsenic, in toxicology 96.
Artesian well of Grenelle, 283.
wells in Sahara, 140.
Asteroids, see *Planets*.
Atmospheric, see *Barometric*.
Atomic weights, see *Equivalents*.
Aurora at Point Barrow, Arctic, 103.
Australia, former connection with N. Guinea and the Arru Islands, 280.

B.

Bache, A. D., tides of Atlantic coast, 47.
winds of the W. coast of U. S., 52.
on the measurement of a base, in the Coast Survey, 53.
Bailey, J. W., biography of, *Gould*, 153.
Barnard, J. G., on the gyroscope, 67, 417.
Barometric pressure, annual variations in Gulf of St. Lawrence, *Kelly*, 448.
Barrington's work on Polar exploration, 84, 384.
Barth's African discoveries, 306.
Blake, W. P., on Chalchihuitl, 227.
Report on California, noticed, 317.
Blodget's Climatology, reviewed, 235.
Boron, *Wöhler* and *Deville*, 271.
Boston Soc. N. H. Proceedings, 152.
Journal of, 304.
Botany, notices of books by *A. Gray*, 109, 290; Weddell on the Urticeæ, 109; Miquel's Batavian flora, 111; Walper's Annales, 112; Pringsheim's Jahrbuch, 112; Radlkofer on Fecundation, 112; Seemann's Botany of the Herald, 116; Hooker on the Balanophoreæ, 116; Boussingault on nitrogen for plants, 120; De Candolle's Prodromus, 290; Hooker's Tasmanian Flora, 292; Linnæan Society, 292; Reinwardt's Batavian plants, 293.
Lichens in N. American, *Tuckerman*, 422.
action of foreign pollen on the fruit, 122.
on the flower and fruit of the Pear, *Decaisne*, 123.
Botanical Necrology for 1857, 293.
Bowerbank on the Spongiadæ, 114.
Brannon's Handbook of Receipts, noticed, 450.
Brush, G. J., on Chalcodite, 198.

C.

California, temperature of, 237.
observations on, from *W. P. Blake's* Report, 317.
earthquake in, *Trask*, 146.
Carbonates of lime and baryta, action with saline solutions, *Storer*, 41.
Carbonic acid in mineral waters, *Storer*, 41.
Cerium, preparation of pure compounds of, 438.
Chimborazo, ascent of, *Remy*, 141.
Clark, A., new double stars, 129.
Clark, H. J., notice of Agassiz on the Embryology of the Turtle, 342.
Clark, T. E., on Fichtelite, 164.
Classification of mammals, *R. Owen*, 177.
Agassiz on, reviewed, *J. D. Dana*, 321
of Crustacea, *J. D. Dana*, 335.
Climatology of Blodget, reviewed, 235.
Coal fossils, see *Fossil*.
Coal, Breckenridge, 285.
of Saxony, *Stein*, 283.

INDEX TO VOLUME XXV.

Bowerbank on the Spongiadæ, 114.
Brannon's Handbook of Receipts, noticed, 450.
Brush, G. J., on Chalcodite, 198.

C.

California, temperature of, 237.
observations on, from *W. P. Blake's* Report, 317.
earthquake in, *Trask*, 146.
Carbonates of lime and baryta, action with saline solutions, *Storer*, 41.
Carbonic acid in mineral waters, *Storer*, 41.
Cerium, preparation of pure compounds of, 438.
Chimborazo, ascent of, *Remy*, 141.
Clark, A., new double stars, 129.
Clark, H. J., notice of Agassiz on the Embryology of the Turtle, 342.
Clark, T. E., on Fichtelite, 164.
Classification of mammals, *R. Owen*, 177.
Agassiz on, reviewed, *J. D. Dana*, 321
of Crustacea, *J. D. Dana*, 335.
Climatology of Blodget, reviewed, 235.
Coal fossils, see *Fossil*.
Coal, Breckenridge, 285.
of Saxony, *Stein*, 283.

Coan, volcano of Kilauea, 136.
Coast Survey, measurement of base in, 58.
review of results of, 75, 249.
Report for 1856, 315, 450.
Cobalt, equivalent of, *Schneider*, 438.
Comets, new, 5th and 6th of 1857, 128.
1st and 2nd of 1858, 447.
Compressed air, 96.
Continents, *Owen*, on outlines of, 130.
Copper, metallurgy, &c. of, by *Piggott*, noticed, 446.
Cosmogony of *T. A. Davies*, noticed, 108.
Criticism of Nat. Bidrag, &c. on Greenland zoology, *Stimpson*, 124.
Crustacea, classification of, *J. D. Dana*, 335.
Crystals, magnetic induction of, *Plücker*, 272.

D.

Dana, J. D., review of Agassiz's Contributions to U. S. Nat. History, 202, 321.
cephalization, a fundamental and potential element in classification, 213 (note), 336.
Fifth Supplement to Mineralogy of, 396.
Daniel's Geological Report, noticed, 275.
Daubeny, C., Lectures on Roman husbandry of, noticed, 302.
Davies, Cosmogony of, noticed, 108.
Dawson, post-pliocene of Montreal, 275.
Density of the earth, mean, 443.
Depth of Mediterranean, 310.
Descloizeaux, A., extracts from a paper by, on refraction in minerals, 396.
Didymium, optical test, *Gladstone*, 100.
Dumas, equivalents of the elements, 267.
Dunglison's Medical Lexicon, noticed, 302.

E.

Earth, chemistry of primeval, *Hunt*, 102.
direction of gravity, *Hennessy*, 106.
mean density of, 443.
temperature, at depths, 443.
Earthquake of Sinaoda, conclusions from, 83.
in California, *Trask*, 146.
in Italy, 280.
at St. Louis, Buffalo, etc., 136.
Electric telegraph in the determination of longitude, 79.
Electrolytic investigations, *Magnus*, 98.
Electrotype processes, *Moigno*, 144.
Elephant, American, in Mexico, 283.
fossil, of Great Britain, 274.
Embryology of the Turtle, *Agassiz*, 342.
Equivalents of the elements, *Dumas*, 267.
of cadmium, manganese, tellurium, cobalt, nickel, 438.
Ethnography of Rocky Mountain region, *Mollhausen's* work on in progress, 319.
Euphotide, *T. S. Hunt*, 437.

F.

Falconer, Mastodon and Elephants, 274.
Feldspars, origin of, *T. S. Hunt*, 435.
Flame, musical sounds from, *LeConte*, 62.
Fluorescence of Oleum Neroli, 300.
Fossils of Anticosti, 445.
Carboniferous, new, *Stevens*, 258.
of Missouri and Kansas, *Shumard* and *Swallow* on, noticed, 447.
batrachians, *Wyman*, 158.
Fossil coal plants, *Kimball*, 151.
plants of Pennsylvania, &c., *Lesquereux*, 286, 447.
Cretaceous, from Vancouver's Id., 443.
Crinoids of N. York, *J. Hall*, 277.
Eifel Echinoderms, 151.
Elephants and Mastodon, *Falconer*, 274.
American elephant in Mexico, 283.
Elk in Switzerland with remains of art, 279.
of Nebraska, *Meek, Hayden* and *Leidy*, 439.
new Palæozoic, *J. Hall*, 108.
Post-pliocene of Montreal, *Dawson*, 275.
recent quadrupeds, in the U. S., 442.
Permian, of Kansas, 305*, 442, 451.
of Guadalupe Mts., N. Mexico, 442.
notices of Vienna publications, 287.
see further, *Geology*.

G.

Gallic acid, derivatives of, 101.
Geographical notices, *D. C. Gilman*, 305.
Geology of Anticosti, 445.
former connection of Australia with New Guinea and the Arru Islands, 280.
Crystalline limestone of Canada, 444.
limits of distribution of marine types of animals in freshwater, 290.
Permian strata in Kansas, *G. C. Swallow*, 305,* 442.
ibid., *Meek* and *Hayden*, 442.
in Guadalupe Mts., 442.
of Nebraska, *Meek* and *Hayden*, 439.
outlines of continents, *Owen*, 130.
See further, *Fossil*.
Geological Report, Canada, noticed, 444.
Survey of Illinois, Report on, noticed, 286.
Iowa, notice of, 445.
Kentucky, notice of, 283, 447.
Vermont, 150.
Wisconsin, *Daniels*, 275.
Gibbs, W., rational constitution of certain organic compounds, 18.
equivalent of cobalt, 438.
chemical abstracts, 98, 265, 438.
Gibbs and *Genth*, a new base containing osmium, 248.
Gilman, D. C., Geographical notices, 305.
Gould, A. A., address on J. W. Bailey, 153.
Gould, on the U. S. Humming bird, 295.
Graham's Chemistry, noticed, 303.
Gray, A., botanical notices and notes, 111, 290.
Greenland zoology of Nat. Bidrag, *W. Stimpson*, 124.
Gulf Stream, Coast Survey on, 250.
Gyroscope and top, *J. G. Barnard*, 67, 417.

H.

Hall, J., new Palæozoic fossils, 108.
Crinoids of New York, 277.
Haskins, R. W., the Open Polar Sea, 84.
Hayes, A. A., meteorite of Marblehead, 135.
Hayes, I. I., the passage to the N. pole, 384.
Heat, influence of metals on radiant, 99.
developed in water by agitation, 145.
Hennessy, direction of gravity at the earth's surface, 106.

Hennessy, change of sea level caused by variations in the earth's ellipticity, 109.
Hildreth, S. P., meteorological register for 1857, 357.
Himalayas, *Schlagintweit*, 310.
Holmes, F. S., recent Mammalia in the U. S. post-pliocene, 442.
Humboldt's Cosmos, 302.
Humming bird of the U. States, 295.
Hunt, E. B., on infinity, 1.
Hunt, T. S., chemistry of the primeval earth, 102.
on ophiolites, 217.
silicates of the alkalies in metamorphism, 287.
on the extraction of salts from sea water, 361.
origin of feldspars 435.
on Saussurite and Euphotide, 437.
Chemical Geological Report, 443.

I.

Infinity, *E. B. Hunt*, 1.
Insects, see *Zoology*.

J.

Jamin, on indices of refraction, 215.
Johnston, C., on preparing and mounting hard tissues for the microscope, 232.

K.

Kane, *Edler's* life of, noticed, 303.
Kansas, Permian of, *Swallow*, 305*; *Swallow* and *Hawn*, 442; *Meek* and *Hayden*, 442, 451.
Kelly, W., variations of atmospheric pressure, in the Gulf of St. Lawrence, 448.
Knoblauch, radiant heat and metals, 99.
Kokscharov, Mineralogie Russlands, 396.

L.

Lead, perforation of, by insects, 432.
LeConte, J., influence of musical sounds on the flame of a jet of gas, 64.
Leidy, J., on Nebraska fossils, 441.
Lesquereux, L., coal plants of Pennsylvania, etc., 285, 447.
Level of sea, changed by variations in the Earth's ellipticity, *Hennessy*, 109.
change of, at Armagh Observatory depending on the season, 107.
change of, in Baltic, 443.
Lichens of North America, *Tuckerman*, 422.
Light, action on oxalate of iron, 102.
new discoveries in action of, *Niepce*, 148.
Livingstone's African discoveries, 306.
Logan's Canada Geol. Report, noticed, 444.
Longitude by electric telegraph, 79.
of Cambridge, Mass., 80.

M.

McMayer, A., estimation of weights of small portions of matter, 39.
Madder, cultivation of, 96.
Magnus, electrolytic investigations, 98.
Mallet, fluorescence of Oleum Neroli, 300
Mammalia, *Owen* on classification of, 7, 177
Man, races of, and enumeration, 137.
Mastodon of Great Britain, *Falconer*, 274.
Meek and *Hayden*, Permian fossils of Kansas, 442, 451.
on Nebraska, 441.
Meridian, measurement of arc of, in Russia, 315.
Metamorphism, *T. S. Hunt* on, 287, 435.
prize relating to, 435.
Meteorite, supposed, of Marblehead, Mass., *Hayes*, 135.
Microscope, preparing hard tissues for, *Johnston*, 232.
Mineral collection, Wheatley's, 447.
Minerals, indices of refraction of, *Descloizeaux*, 397.
formation of, by action of steam, *Daubrée*, 401.

MINERALS—
Agalmatolite, and slates, 401.
Algodonite, *Field*, 402.
Allanite, *D. Forbes*, 402.
Alunite, *F. Römer*, 402.
Ankerite of Lobenstein, 402.
Anthracoxene, *Reuss*, 402.
Apatite (hydro-apatite), 408.
Aphrodite, 414.
Apophyllite, formation of, 402.
Aragonite near the Arkansas, 402.
Astrakanite, *v. Hauer*, 402.
Atacamite, from Africa, 403.
Autunite, *Descloizeaux*, 416.
Barytes, *F. Pfaff*, 403.
Beryl, 403, 416.
Bendantite, *Dauber*, *Rammelsberg*, *Sandberger*, 403
Bismuthine, from Joachimsthal, 403.
Bismutite, from Joachimsthal, 403.
Blende from Clausthal, black, 404.
Blœdite of Ischl, 402.
Bournonite of Clausthal, 404.
Brucite at Wood's Mine, Pa., 107.
Calcite, brown, from Arendal, 404.
limestone of Tuscan lagoons, 404.
Cassiterite of Finland, 404.
Chalchihuitl, of Mexico, 227.
Chalcolite, *Bush*, 198, 404.
Cherokine of Shepard, *Hunt*, 404.
Chesterlite, 410.
Chloanthite, 413.
Chlorite, *Descloizeaux*, 404.
Chloritoid, of the Urals, 405.
Cinnabar, *Descloizeaux*, 406.
Clinochlore, 405.
Cobalt Bloom, see *Erythrine*.
Columbite, 406, 416.
Condurrite, 406.
Diallage, 411.
Domeykite, *F. Field*, 406.
Dufrenoysite, *von Waltershausen*, 406.
Eliasite, 415.
Emerald of Muso, 416.
Epidote, *R. Hermann* on, 406.
Erythrine from Joachimsthal, 407.
Euchroite, a mineral resembling, 407.
Euclase, of the Urals, 416.
Eukolite, *Descloizeaux*, 407.
Faroelite, *Heddle*, 407.
Feldspar, see *Orthoclase*.
Fichtelite, *T. E. Clark*, 164.
Garnet (garnet rock), *Hunt*, 407.
Gold, in Washington Territory, 407.
Glaubersalt in Nova Scotia, 407.

MINERALS—
Haidingerite at Joachimsthal, 407.
Harmotome, locality of, 408.
Hayesine, in Nova Scotia, 408.
Hyalophane, von *Waltershausen*, 408.
Hydro-apatite, *Damour*, 408.
Hypostilbite, 409.
Idocrase, *R. Hermann*, 406.
Ilmenite, 403.
Ilmenorutile, 412.
Ixiolite, 414.
Johannite, 415.
Kaolin, analyses, 408.
Kapnicite, *Kenngott*, 408.
Kenngottite, *Haidinger*, 409.
Laumontite, 409.
Leucite, *Bischof, Rammelsberg*, 409.
Leuchtenbergite, 404.
Liebigite 415.
Lievrite, 416.
Löweite at Ischl, 409.
Marcasite, *v. Kobell*, 409.
Mispickel, analysis, 410.
Monazite, *E. Zschau*, 410.
Naphtha, 410.
Natro-boro-calcite in Nova Scotia, 408.
Orthoclase, *Breithaupt*, 410.
Pennine, 404.
Phenacite, crystals, *v. Kokscharov*, 410.
Pitchblende, 415.
Prosopite, *Scheerer, Brush, Dana*, 410.
Pyrophyllite, *Descloizeaux*, 411.
Pyrosclerite, *Descloizeaux*, 411.
Pyroxene, 411.
Rensselaerite, 414.
Ripidolite 404.
Rutile (ilmenorutile), 412.
Salt Cheshire brine springs, 412.
Saussurite, 437.
Scapolite, Glaucolite identical with, 412.
Scolecite, formation of, 412.
Serpentine, 217, 412.
of Syracuse, N. Y., 412.
Silver, pseudomorph, 413.
glance at Joachimsthal, 413.
Smaltine at Joachimsthal, 413.
Stilbite from Hindostan, 413.
Svanbergite, *Dauber*, 413.
Talc, *T. S. Hunt*, 225.
Potstones, *Delesse*, 413.
Rensselaerite, *Hunt*, 414.
Tantalite, *Nordenskiöld*, 414.
Tetrahedrite, *C. Kuhlemann*, 414.
Turquois, 414.
Uigite, *Heddle*, 414.
Uranium Ores, 415.
Uranbloom, 415.
Urangreen, 415.
Uranochalcite, 415.
Uranochre, 415.
Urlite, 410.
Voltzine from Joachimsthal, 416.
Witherite (Thomson's sulphato-carbonate), 416.
Wulfenite, *Descloizeaux*, 416.
Zippeite, 415
Zeolites, *Damour* on, 416.
Mineralogy, 5th supplement to *Dana's*, 396.
Determinative, *Brush* and *Johnson's* translation of von Kobell, announced, 151.
Morfit, C., on brown sugar, 393.

N.

Nebraska geology and fossils, *Meek* and *Hayden*, 439.
Nickel equivalent of, *Schneider*, 438.
Nicklès, J., correspondence of, 91, 433.
bibliographical notices, 451.
North pole, passage to, *Hayes*, 384.
Numbers, in phyllotaxis and the order of the planets, 215.

euphotide, 437.
metamorphism of, 287, 435.
Rocky Mountain railroad explorations, Reports on, noticed, 149.

S.

Sabine, aurora at Pt. Barrow, 103.
Sahara artesian wells, 140.
Salines and salt of France, *Hunt*, 361.
Schlagintweit, brothers, on India, 310.
Seawater, extraction of salts from, 361.
Shumard, B. F., Permian in the Guadalupe Mountains, Rocky chain, 442.
Silicon, new compounds, *Buff*, 270.
Soundings, see *Depth*.
Stars, new double, *A. Clark*, 129.
Stein, on coal of Saxony, 283.
Stereoscope, *Helmholtz*, 297.
Stevens, R. P., new carbonif. fossils, 258.
Stimpson, W., Greenland zoology, 124.
on Leptosiagon, 295.
Storer, F. H., behavior of $\dot{C}a\bar{C}$ and $\dot{B}a\bar{C}$ with various saline solutions; on the determination of carbonic acid in mineral waters, 41.
Sugar, method of refining, *Daubeny*, 144.
brown, chemical examination of, *Alexander* and *Morfit*, 333.
Sun's spots, periodicity in, *Reichenback*, 295.
parallax, new determination of, *Gilliss*, 305*.
Swallow, G. C., Permian in Kansas, 305*, 442.
on carboniferous fossils, noticed, 447.

T.

Taylor, W. J., on green-gilled oysters, 294.
Telestereoscope, *Helmholtz*, 297.
Temperature of earth at depths, 443.
Thenard, obituary notice of, 430.
Tide observations, Coast Survey, 81.
Tides of the Atlantic coast, *Bache*, 47.
Tobacco manufacture in Paris, 434.
Top, on the motion of, *J. G. Barnard*, 74.
Trask, J. B., earthquake in California, 146.
Tuckerman, E., N. American lichens, 422.
Tuomey and *Holmes*, S. C. fossils, noticed, 146.
Turtle, embryology of, *Agassiz*, 342.

U.

Unity of the human race, 328.
Urals, notes on, 314.

V.

Vapors, densities of certain, 268.
Vienna scientific publications, 287.
Volcano of Kilauea, *T. Coan*, 136.
Volcanoes, extinct, of Australia, 289.

W.

Water, heat developed in, by agitation, 145.
Weddell, on the Urticeæ, noticed, 109.
Wheatley collections, 446.
Wollaston medal, 290.
Wurtz, contributions to analyt. chem., 371.
Wyman, J., carboniferous batrachian remains, 158.

Z.

Zoology—Agassiz's contributions to U. S. Nat. Hist., noticed. 125, 202, 321.
classification of Crustacea, *J. D. Dana*, 335.
classification of mammals, *Owen*, 7, 177.
Insects, perforation of lead by, 432.
Leptosiagon of Trask, *Stimpson*, 295.
Greenland, *Stimpson*, 124.
see farther, *Fossils*.
Zoological classification, Agassiz on, reviewed, *J. D. Dana*, 321.
